

IN THE CLAIMS

This listing of the claim will replace all prior versions and listings of claim in the present application.

Listing of Claims

Claim 1 (canceled).

2. (previously presented) A method according to Claim 31, wherein said commands include a second command for modifying, changing, adding and deleting all or a portion of said moving image, said method further comprising the steps of:

displaying said modification, change, addition and deletion of all or a portion of said moving image on said display unit;

selecting one of said modification, change, addition and deletion of all or a portion of said moving image;

displaying on said display unit third commands comprised of setting items including camera, superimposition, sound, mixer, narration and studio set-up by selecting a corresponding one of said modification, change, addition and deletion of all or a portion of said moving image; and

designating one of said third commands and executing said designated command for the designated CG object.

Claims 3-30 (canceled).

31. (currently amended) A method of editing a moving image displayed on a display unit, comprising the steps of:

designating a computer graphics (CG) object while moving or pausing said moving image displayed on said display unit;

displaying on said display unit a command list which shows a plurality of commands relating to the designated CG object at the time of designating the CG object,

wherein said commands being listed on said command list are arranged in order of time when said commands were produced for editing the designated CG object and a subsequent portion of the moving image; and

designating and executing each command relating to the CG object shown in said command list, thereby causing an editing operation operations to be performed on the designated CG object of moving image to be conducted,

wherein each of said commands, when executed, causes one of a plurality of editing operations to be performed on the designated CG object including editing speech associated with the designated CG object, editing motion of the designated CG object, and editing reproduction of a moving image or audio associated with the designated CG object.

Claim 32 (canceled).

Claims 33 and 34 (canceled).

35. (currently amended)An apparatus for editing a moving image displayed on a display unit, comprising:

a computer graphics (CG) animation generating unit coupled to said display unit for generating an image;

a recording unit for recording an image generated in said CG animation generating unit; and

a control unit for controlling said display unit, said CG animation generating unit and said recording unit;

wherein said control unit includes:

means for designating a CG object while moving or pausing said moving image displayed on said display unit,

means for displaying on said display unit a command list which shows a plurality of commands relating to the designated CG object at the time of designating the CG object,

wherein said commands being listed on said command list are arranged in order of time when said commands were produced for editing the designated CG object and a subsequent portion of the moving image; and

means for designating and executing each command relating to the CG object shown in said command list, thereby causing an editing operation operations to be performed on the designated CG object of the moving image,

wherein each of said commands, when executed, causes one of a plurality of editing operations to be performed on the designated CG object including editing speech associated with the designated CG object, editing motion of the designated CG object, and editing reproduction of a moving image or audio associated with the designated CG object.

Claims 36-38 (canceled).
